## INTENSE PULSED LIGHT THERAPY (IPL)

IPL (Impulsive Light Treatment) is a non-invasive cosmetic treatment that uses light to improve skin imperfections such as sun damage, hyperpigmentation, age spots, acne scars, rosacea, as well as fine lines & wrinkles.

Collagen production stimulation is one of the benefits of IPL treatments. The heat generated by the light energy promotes the production of new collagen fibers, which helps to improve skin elasticity, texture, and overall youthfulness.
